Event Summary

TARC staff presented the financial circumstances leading to the TARC 2025 planning process, the three concepts, questions being asked of the community, and the remaining timeline.

An engaged discussion, question and answers followed the presentation. Questions and comments included:

- Potential impact on TARC 3 and paratransit service users. How will that be addressed?
- What are TARC's sources of funding available now?
- What other sources of funding TARC plans to explore for service improvements?
- Some areas of the community that will lose service? What will impact on passengers?
- No service in Dist 17 under the ridership concept.
- TARC could use smaller buses to reduce the cost.

- How much more in tax revenue is needed for TARC to improve service?
- Timeline for plan implementation.
- What if the funding is not available for the growth network. Would TARC make incremental improvements?

Participant Description

Mix of men and women, mostly white ages 50-65.
